

I don't listen to anything else other than K-Love. It is a wonderful station that brings a positive mood to any listening community. If you take K-Love off the air, you are leaving the only alternatives, such as rap and/or country. Neither are positive or encouraging for children to listen to. They promote adultery, drinking, sex before marriage, running from the law, etc... All the above are not good influences for children or adults. I believe K-Love should not be taken off the air because it is in the public's best interest. Thank you.
